TECH STACK

PROJECTS

NestJS React TypeScript Head Hunter
<https://github.com/Fremen1990/head-hunter-frontend>
<https://github.com/Fremen1990/head-hunter-backend>
 Project Head Hunter is a final bonus stage of 1 year Full Stack JS Bootcamp. I tried my hand as Scrum Master of 5-7 people team. The application brings together all knowledge and technologies which we were learning throughout the bootcamp, we also dared to learn and use new techs as redux and styled components during development process. Application is created to connect software developer students with recruiters through admin supervision.

MERN DevSocialMedia with TypeScript
<https://github.com/Fremen1990/DevSocialMedia-frontend>
<https://github.com/Fremen1990/head-hunter-backend>
 This is full stack MERN + TypeScript project, the goal of this project was to test all skills gathered in one year full stack bootcamp and to pass final exam.

Netflix Clone - React, styled components & Testing
<https://github.com/Fremen1990/netflix-clone>
 The goal of this project was to get known styled components, firebase and testing with React Testing Library as well as Jest

MERN Full Stack E-Commerce
<https://github.com/Fremen1990/E-Commerce-MERN-NODE-REACT>
 This is my first E-Commerce MERN Full Stack application build in Node, Express, React and MongoDB

TomPhase - 2d Game in Phaser JS Engine
<https://dev-thomas-thom-phase-game.netlify.app/>
 This is my first game in Phaser engine, a lot of mechanics it is in use here including animations, stages, tales with tale Editor and more. Open for future enhancements and improvements.
